

## Integrate Chatbot to the HTML page

Date	18 November 2022
Team ID	PNT2022TMID40325
Project Name	Smart Fashion Recommender Application

Step 1: Code to integrate with HTML Page.

The screenshot shows the IBM Watson Assistant web chat configuration interface. At the top, there's a navigation bar with 'Web chat' (Live), 'Close', and 'Save and exit' buttons. Below this is a tabbed interface with 'Style', 'Launcher', 'Home screen', 'Live agent', 'Suggestions', 'Security', 'Embed', and 'Resources'. The 'Embed' tab is selected, displaying a code block for embedding the chatbot on a website. The code is as follows:

```
<script>
window.watsonAssistantChatOptions = {
  integrationID: "a2de19d5-12a8-471c-a817-5d02d288fd7f", // The ID of this integration.
  region: "jp-tok", // The region your integration is hosted in.
  serviceInstanceID: "ade42fa0-e9a0-4f37-921d-5e4439484e19", // The ID of your service instance.
  onLoad: function(instance) { instance.render(); }
};
setTimeout(function(){
  const t=document.createElement('script');
  t.src="https://web-chat.global.assistant.watson.appdomain.cloud/versions/" + (window.watsonAssistantChatOptions ?
document.head.appendChild(t);
});
</script>
```

Below the code block, there's a 'Show more' link.

Homepage.html:

The screenshot shows a Visual Studio Code editor with the 'homepage.html' file open. The file contains the following HTML code:

```
<html>
<head>
  <title>shopping</title>
</head>
<script>

window.watsonAssistantChatOptions = {
  integrationID: "a2de19d5-12a8-471c-a817-5d02d288fd7f", // The ID of this integration.
  region: "jp-tok", // The region your integration is hosted in.
  serviceInstanceID: "ade42fa0-e9a0-4f37-921d-5e4439484e19", // The ID of your service instance.
  onLoad: function(instance) { instance.render(); }
};
setTimeout(function(){
  const t=document.createElement('script');
  t.src="https://web-chat.global.assistant.watson.appdomain.cloud/versions/" + (window.watsonAssistantChatOptions ?
document.head.appendChild(t);
});
</script>
<body bgcolor="blue">

</body>
</html>
```

Step 2: chatbot in web application.
