

CHATBOT

Integrate with html page:

The screenshot shows the IBM Watson Assistant web interface. At the top, there's a navigation bar with 'Web chat' (Live), 'Close', and 'Save and exit' buttons. Below this is a tabbed interface with tabs for 'Style', 'Launcher', 'Home screen', 'Live agent', 'Suggestions', 'Security', 'Embed' (selected), and 'Resources'. The 'Embed' tab displays a code block for embedding the chatbot on a website. The code is as follows:

```
<script>
window.watsonAssistantChatOptions = {
  integrationID: "a2de19d5-12a8-471c-a817-5d02d288fd7f", // The ID of this integration.
  region: "jp-tok", // The region your integration is hosted in.
  serviceInstanceID: "ade42fa0-e9a0-4f37-921d-5e4439404e19", // The ID of your service instance.
  onLoad: function(instance) { instance.render(); }
};
setTimeout(function(){
  const t=document.createElement('script');
  t.src="https://web-chat.global.assistant.watson.appdomain.cloud/versions/" + (window.watsonAssistantChatOptions.clientVersion || 'latest') +
  "/WatsonAssistantChatEntry.js";
  document.head.appendChild(t);
}, 1000);
</script>
```

Below the code block, there is a 'Show more' link.

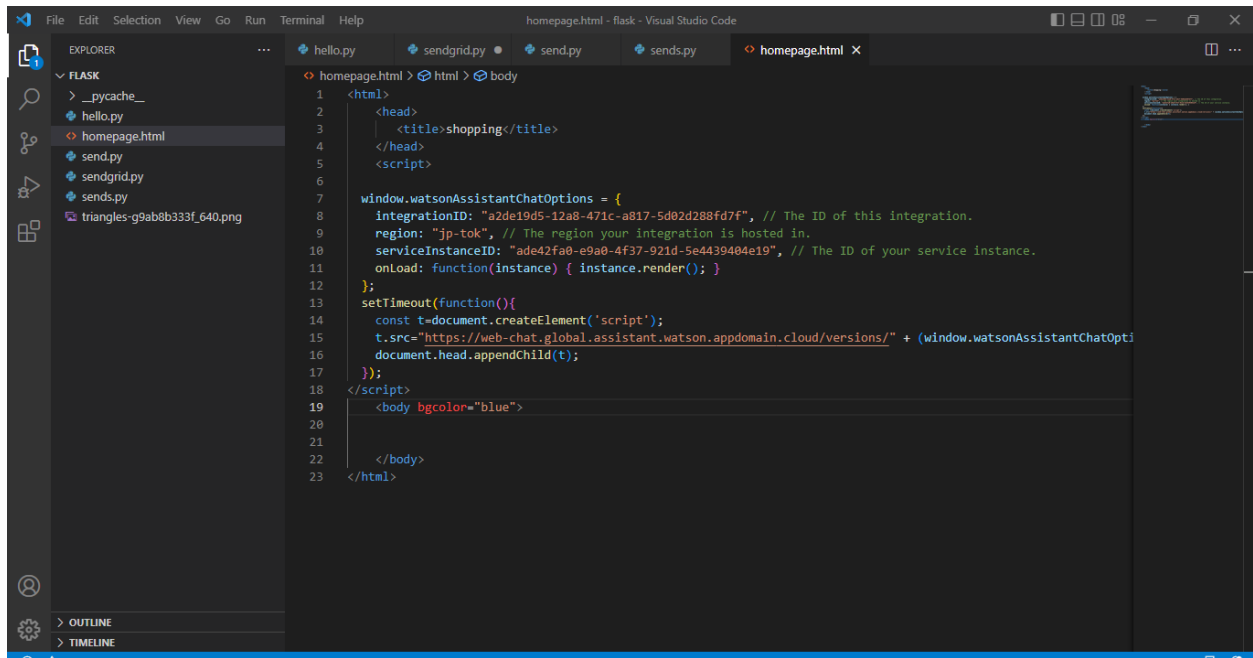

Homepage.html:

```
<html>
<head>
  <title>shopping</title>
</head>
<script>
  window.watsonAssistantChatOptions = {
    integrationID: "a2de19d5-12a8-471c-a817-5d02d288fd7f", // The ID of this
integration.
    region: "jp-tok", // The region your integration is hosted in.
    serviceInstanceID: "ade42fa0-e9a0-4f37-921d-5e4439404e19", // The ID of
your service instance.
    onLoad: function(instance) { instance.render(); }
  };
  setTimeout(function(){
    const t=document.createElement('script');
    t.src="https://web-chat.global.assistant.watson.appdomain.cloud/versions/" +
(window.watsonAssistantChatOptions.clientVersion || 'latest') +
"/WatsonAssistantChatEntry.js";
```

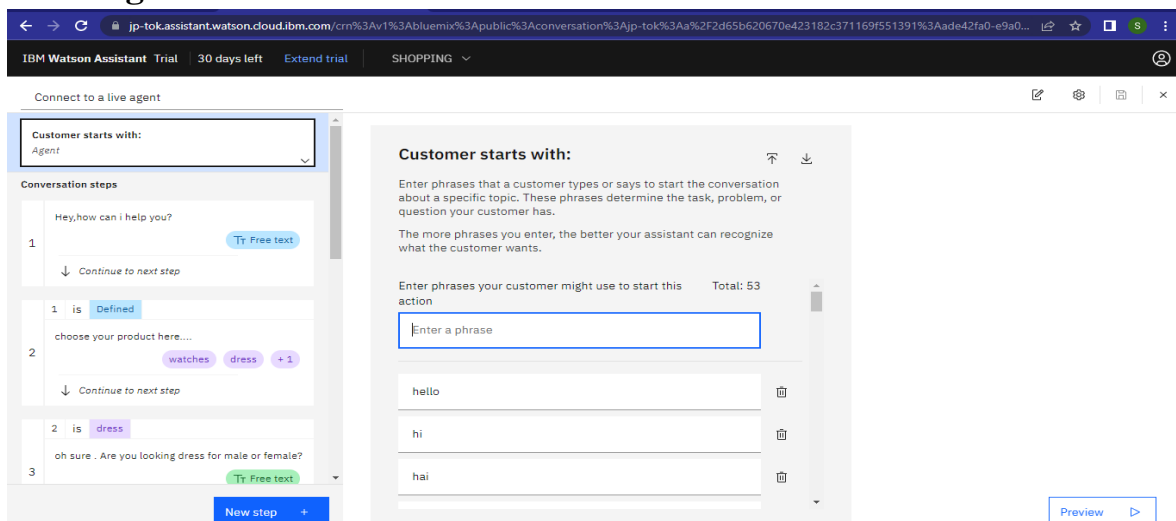

```

        document.head.appendChild(t);
    });
</script>
<body bgcolor="pink">
</body>
</html>

```

Building a chatbot

Chatbot in web application:
